Software Engineer

Full stack software engineer focused on building scalable, reliable software systems across frontend, backend, cloud, and real-time platforms using .NET, C#, TypeScript, Angular, Vue.js, PostgreSQL, and AWS. Recognized for quickly learning new technologies, optimizing systems, communicating complex technical concepts clearly, and taking ownership from concept to implementation.

WORK EXPERIENCE

Tyler Technologies Software Engineer

05/2021 – Present
Plano, TX

- Design and develop enterprise-grade software solutions for government and justice-sector platforms using C#, .NET, Angular, SQL, and related technologies.
- Improved API performance by approximately 85% by eliminating unnecessary database calls, optimizing data-loading strategies, and reducing backend processing overhead.
- Diagnose and resolve complex production and performance issues by analyzing system behavior, improving query efficiency, and refining application architecture.
- Collaborate across Agile teams to communicate technical concepts clearly, improve workflows, and deliver reliable, maintainable software solutions.

Software Developer / Intern

Plano, TX

- Developed and maintained application features while contributing to testing, automation initiatives, and frontend development for enterprise applications.

CERTIFICATIONS

AWS Cloud Practitioner AWS Solutions Architect

PROJECTS

Mineral Kingdom — Full Stack E-Commerce & Auction Platform

- Designed scalable backend APIs using .NET 8, Entity Framework Core, and PostgreSQL.
- Integrated Stripe and PayPal payment systems with webhook-driven payment confirmation architecture.
- Developed real-time systems using Server-Sent Events (SSE) for auctions, order tracking, and fulfillment updates.

JevTech — Engineering Portfolio & Technical Brand

- Building a modern engineering portfolio platform showcasing software architecture, cloud technologies, and development projects.
- Designing interactive developer-focused experiences centered around system design, real-time applications, AI-assisted workflows, and modern web engineering.

SKILLS

Angular, ASP.NET Core, AWS, C#, CI/CD, Docker, Git/GitHub, GitHub Actions, JavaScript, Jira, .NET, Next.js, PostgreSQL, Postman, REST APIs, SQL Server, SSE/WebSockets, Stripe/PayPal Integrations, TypeScript
